Waste Disposal Instructions

C Enter information on tag as waste is added to container. Use ball point pen or marker.

C Write complete names of chemicals; no abbreviations or formulas.

C Store waste in rinsed out chemical bottles or 5 gallon plastic carboys (from OEH&S).

C Keep containers sealed at all times, before and after adding waste.

• Store waste bottles in secondary containers; plastic tubs, trays, or on spill pads.

• Do not mix incompatible chemicals.

• Dispose of all SHARPS in appropriate SHARPS containers (available from OEH&S).

For more information, contact the Wayne State University Office of Environmental Health and Safety at 577-1200.
