How to Write and Interpret Scientific Reviews of Grant Proposals

Professional and Academic Development (PAD) Seminar Series
Friday, November 9, 2012 – 1:00 to 2:30 PM
Welcome Center Auditorium

Discussion Topics:

- What items should I address when writing a scientific review of a grant proposal?
- What do I need to know about rating scales and percentiles, as both a reviewer and as a recipient of a scientific review?
- When I receive a review, what are the key items I should pay attention to?
- Do reviewers use 'code words', and if so, what do they mean? How do I read between the lines when I receive a review?
- How do I write a scientific review?
- How do I know whether to revise and resubmit a proposal, or completely revamp the study?
- How can I use a scientific review to improve my grant proposal for a next submission?

Moderator:
Dr. Wei-Zen Wei, Associate Director, Karmanos Cancer Institute
weiw@karmanos.org

Panelists:
Dr. Christy Chow, Associate Dean, Liberal Arts and Sciences
cchow@wayne.edu
Dr. David Cinabro, Professor, Physics and Astronomy
cinabro@physics.wayne.edu
Dr. David Kessel, Professor, Pharmacology
dhkessel@med.wayne.edu
Dr. Mary Rodgers, Professor, Chemistry
mrodgers@chem.wayne.edu
